

# Rydee APIs

## Legend

Mobile App

Web Portal

## User login

| Method: | Endpoint                                                     | Resource   |
|---------|--------------------------------------------------------------|------------|
| POST    | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | user-login |

Example :

Request: {"phone": "090078601", "password": "Secret1"}

Response: {  
    "role": "customer",  
    "profile": {  
        "name": "Ghulam Ali",  
        "dateOfJoining": "2026-07-31T14:23:53.651Z"  
    }  
}

## Register new user/rider

| Method: | End point                                                    | Resource      |
|---------|--------------------------------------------------------------|---------------|
| POST    | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | register-user |

Example 1:

Request: {"phone": "090078601", "role": "rider"}

Response: {"message": "Missing required fields: phone, role, password and name"}

Example 2:

Request: {"name": "Ghulam Ali", "phone": "090078601",  
          "role": "rider", "password": "superSecret1"}

Response: {"message": "Riders require name, dob and address"}

Example3:

Request: {"name": "Ghulam Ali", "phone": "090078601", "role": "rider", "password":  
          "Secret1", "dob": "2000-05-25", "address": "Purani Haveli"}

Response: {  
    "message": "User profile created successfully",  
    "userId": "USER#090078601"}

## Update User

| Direction: | End point                                                    | Resource    |
|------------|--------------------------------------------------------------|-------------|
| POST       | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | update-user |

Example 1:

Request: {"phone": "0219567890", "rating": "5", "dob": "1998-05-10"}

Response: {"message": "Missing required identifier fields: phone, role"}

Example 2:

Request: {"phone": "0219567890", "role": "rider", "rating": "5", "dob": "1998-05-10"}

Response: {  
    "message": "User profile patched successfully",  
    "updatedFields": {  
        "rating": "5",  
        "dob": "1998-05-10"  
    }  
}

## Get all inactive riders

| Direction: | End point                                                    |                         |
|------------|--------------------------------------------------------------|-------------------------|
| POST       | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | get-all-inactive-riders |

Example:

Request: No data

Response:

```

```

## Activate Rider

| Method | End point                                                                                                                               | Resource       |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------|----------------|
| POST   | <a href="https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod">https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod</a> | activate-rider |

### Example 1:

Request: {"phone": "090078601", "pin": "123456"}

Response: {  
 "success": true,  
 "message": "User profile activated and PIN set successfully",  
 "updatedFields": {  
 "activation\_status": "active",  
 }  
}

### Example 2:

Request: {"phone": "090078621", "pin": "123456"}

Response: {  
 "success": false,  
 "error": "User profile does not exist!"  
}

## Rider Login

| Direction: | End point                                                    |             |
|------------|--------------------------------------------------------------|-------------|
| POST       | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | rider-login |

### Example 1:

Request:

```
{"phone": "090078601", "password": "Secret1"}
```

Response:

```
{  
  "success": false,  
  "error": "phone and pin are required"  
}
```

### Example 2: (Rider is registered, but not activated yet)

Request:

```
{"phone": "090078601", "pin": "123456"}
```

Response:

```
{  
  "success": false,  
  "error": "User profile exists but PIN has not been set yet"  
}
```

### Example 3:

Request: {"phone": "090078601", "pin": "123456"}

Response: {

```
  "role": "rider",  
  "profile": {  
    "name": "Ghulam Ali",  
    "dateOfJoining": "2026-07-31T14:21:39.327Z"  
  }  
}
```

## Start Trip

| Method | End point                                                    | Resource   |
|--------|--------------------------------------------------------------|------------|
| POST   | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | start-trip |

Example: TBD

## End Trip

| Method | End point                                                    | Resource |
|--------|--------------------------------------------------------------|----------|
| POST   | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | end-trip |

Example: TBD

## GPS Update

| Method | End point                                                    | Resource   |
|--------|--------------------------------------------------------------|------------|
| POST   | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | gps-update |

Example: TBD

## Ride Accept

| Method | End point                                                    | Resource    |
|--------|--------------------------------------------------------------|-------------|
| POST   | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | ride-accept |

Example: TBD

## Go Online

| Method | End point                                                    | Resource  |
|--------|--------------------------------------------------------------|-----------|
| POST   | https://aud3duadx9.execute-api.ap-south-1.amazonaws.com/prod | go-online |

Example: TBD
